

When do frames / poles of beds become an fix?

There are 3 levels, depending on their strength:

1. חזק → is **NOT** a long term fixture. It therefore only becomes an fix if it is **10 tefachim** high and has a "**roof**" attached on top.
is stronger and more long term than a חזק. It therefore is an fix if it has **10 tefachim** **OR** has a roof.

3. חזק →

is the strongest fixture and a long term attachment. It is

therefore an fix even if less than 10 tefachim high

PROVIDED it has a roof.
